

Botswana-SADC Multimodal Inland Waterway & Freight Corridor

A strategic multi-national infrastructure and economic development platform connecting inland production centres to regional gateways through water, rail, road, air, pipelines, energy and digital systems.

05

TRANSPORT MODES

Waterway, rail, road, air and pipelines

10

DISTRICT AGROPARKS

Productive anchors distributed across Botswana

01

REGIONAL PLATFORM

Integrated governance, investment and operations

THE STRATEGIC PROPOSITION

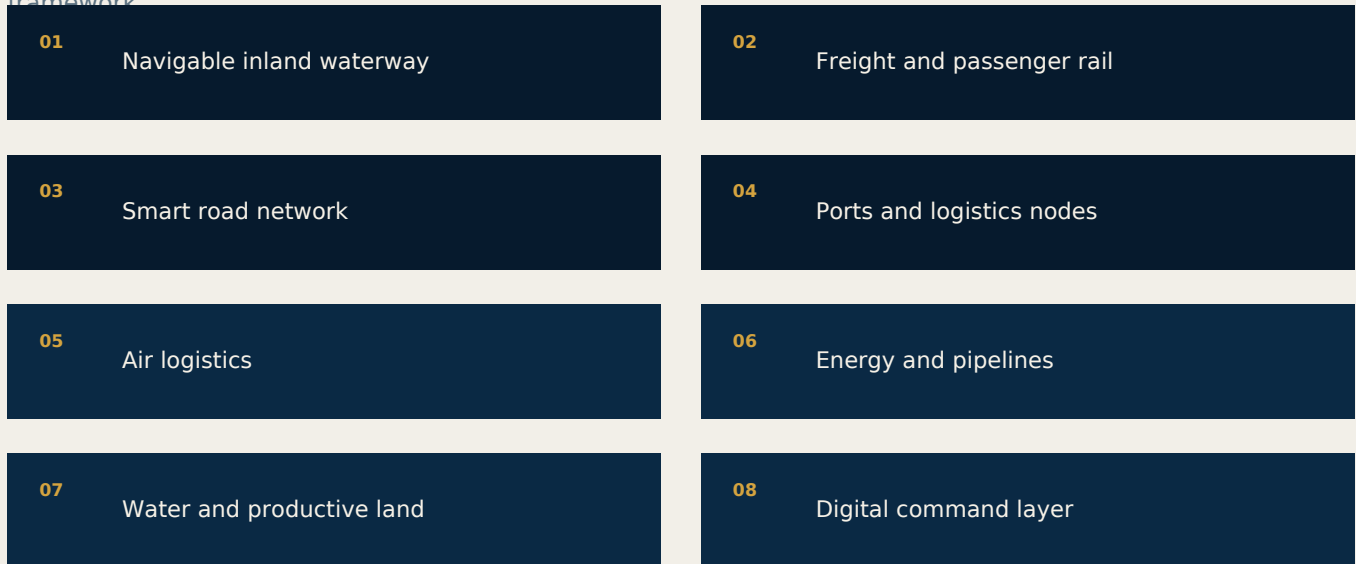

Build the infrastructure spine that allows Southern Africa's inland economies to move, produce, trade and urbanise at continental scale.

Botswana becomes the organising centre of a resilient regional network - aggregating freight, food, minerals, industrial output, energy and investment across SADC.

PROGRAMME ARCHITECTURE

A coordinated corridor, not a collection of isolated projects.

The programme integrates eight infrastructure systems with productive nodes and a single delivery framework

PHASED DELIVERY
